Niagara best practices

1. <u>DO NOT</u> connect stations directly to the Internet
   - Don't end up on Shodan (or the front page of the paper)
   - For remote access, use a VPN solution

2. Niagara 4: Use "secure by default" configurations

3. Don't use default credentials for station or platform

4. Work closely with IT departments

5. Don't forget about physical security

6. Keep up with Niagara security patches

7. Read our security manuals!
