

**Light weight**

**Compact design, which is considerably shorter than ISO/VDMA or NFPA equivalent.**

**Low friction characteristics for high speed operation**

**Hard anodized body for corrosion protection and longer life**

**Duralon® rod bearing for reduced wear**

**Chrome plated stainless steel piston rods**

**Technical data**
**Medium:**

Compressed air, filtered, lubricated or non-lubricated

**Operation:**

DM/95000 BSP parallel ports, single acting, non-cushioned, metric ports, spring return

DM/96000 BSP parallel ports, single acting, non-cushioned, metric ports, spring extend

DC/95000 NPT ports, single acting, non-cushioned, metric ports, spring return

DC/96000 NPT ports, single acting, non-cushioned, metric ports, spring extend

**Operating pressure:**

14.5 to 145 psig (1 to 10 bar)

**Operating temperature:**

-25°F to +250°F (-32°C to +121°C)

Consult our Technical Service for use below 35°F (+2°C)

**Cylinder diameters:**

12, 16, 20, 25, 32, 40, 50 mm

**Strokes:**

5 mm Ø 12 to 40 mm

10 mm Ø 12 to 50 mm

20 mm Ø 50 mm

See table on page N 1.4.099.02

Non-standard strokes available on request

**Materials**

Barrel: hard anodized aluminium

End caps: hard anodized aluminium alloy

Piston rod: stainless steel, hard chrome plated

Elastomers: Buna N

**Alternative cylinders**

See page N 1.4.099.02

**Ordering information**

To order a basic 25 mm bore cylinder, spring return, with a 10 mm stroke, female thread, BSP parallel ports, metric thread, quote: **DM/95025/X/10**.

To order a basic 40 mm bore cylinder, spring extend, with a 5 mm stroke, female thread, NPT ports, inch thread, quote: **DC/96040/X/5**.

Mountings are included. See Options selector table on page N 1.4.099.02

**Accessories**

## Warning

These products are intended for use in industrial compressed air systems only. Do not use these products where pressures and temperatures can exceed those listed under '**Technical Data**'.

Before using these products with fluids other than those specified, for non-industrial applications, life-support systems, or other applications not within published specifications, consult NORGREN.

Through misuse, age, or malfunction, components used in fluid power systems can fail in various modes.

The system designer is warned to consider the failure modes of all component parts used in fluid power systems and to provide adequate safeguards to prevent personal injury or damage to equipment in the event of such failure.

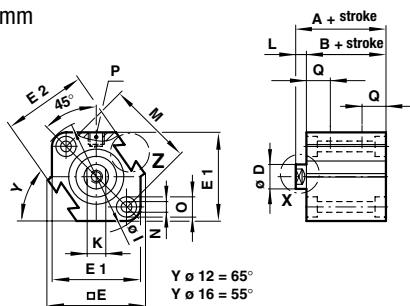

**System designers must provide a warning to end users in the system instructional manual if protection against a failure mode cannot be adequately provided.**

System designers and end users are cautioned to review specific warnings found in instruction sheets packed and shipped with these products.
